ABOUT ME

I am a Software Developer with a BS in Computer Science (BSCS), specializing in React Native mobile app development. I have strong skills in building cross-platform Android applications with smooth UI/UX and real-time features using Firebase. In addition, I have experience in Front-End Development and backend integration with Laravel. I enjoy solving problems, writing clean code, and developing scalable applications. My focus is on delivering reliable, efficient, and user-friendly software solutions that add real value to businesses and users.
